

CABLE GLAND

FOR MARINE ELECTRONIC CABLES

WATERTIGHT INSTALLATION FOR YOUR MARINE ELECTRONIC CABLES.

The Cable Glands provide waterproof cable routing made of UV stable Glass Filled (GF) ABS plastic, 316 stainless steel and black anodized aluminum. Each style has options for 17mm to 31mm (0.67" to 1.25") connectors, making it ideal for almost every installation.

EASY INSTALLATION

Each cable gland is supplied with a blank rubber seal that has a molded location to drill and cut. Captive nuts make for easy assembly. Cable connectors do not need to be removed during installation.

WATERTIGHT INSTALLATION

Tapered rubber seal forms watertight installation. Base gasket also provided for clean water tight installation.

IMPROVED SHAPE & DESIGN

Low profile design for a strong, impact-resistant and clean installation (no sharp edges to hit your foot on). Unlike other brands, our inner rubber seal is flush with the top of the cable gland so that water does not have a place to collect.

CHOICE OF MATERIAL

Stock options are the UV stable grey glass fiber filled ABS plastic, black anodized aluminum and high polished 316 stainless steel. We also offer custom finishes such as carbon, wood grain, various colors, etc. Just about any finish is an option.

AFFORDABLE!

Keep money in your pocket and water out of the boat with the affordable Seaview Cable Gland.

STANDARD FINISHES

CUSTOM FINISHES

Many other finishes available upon special request. (A few examples shown below)

CABLE GLAND PART NUMBER GUIDE

# OF CABLES	COLOR / MATERIAL	CONNECTOR SIZE	CABLE SIZE		
			0.08" - 0.39" (2 - 10mm)	0.08" - 0.59" (2 - 15mm)	0.08" - 0.67" (2 - 17mm)
