

INSTRUCTIONS

ADJUSTABLE GUNNEL MOUNT FILET TABLES P01-2132W, P01-2120W & P01-2012W

Congratulations on your purchase of a TACO adjustable, gunnel mount filet table.

The Pelican filet tables feature a convenient knife and plier holder, and are made of durable, FDA-approved, UV-stabilized high density polyethylene to withstand the harsh marine environment. Adjustable tilt allows for drainage overboard when cleaning fish. The rugged, easy-grip handle adjusts with a single turn and folds flat for convenient removal and storage.

TOOLS REQUIRED:

Adjustable wrench or pliers and a Phillips screwdriver.

ASSEMBLY:

Install all four bolts, flat washers and lock nuts (included) then tighten to secure the mount.

NOTE: Assemble the mount to the table with the mount in loose position (*not tightened*).

MAINTENANCE:

We recommend that you hose off the filet table especially after salt water use. For stubborn stains, use the same type of marine detergent used on your boat and/or fishing gear.
