INSTALLATION INSTRUCTIONS

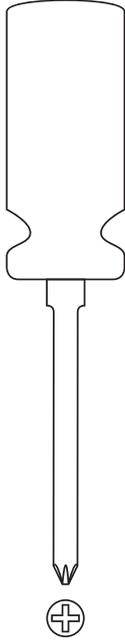

For Seaview Light Bars:

LTB-SF, LTB-SF2

Refer to website for most up to date instructions and videos.

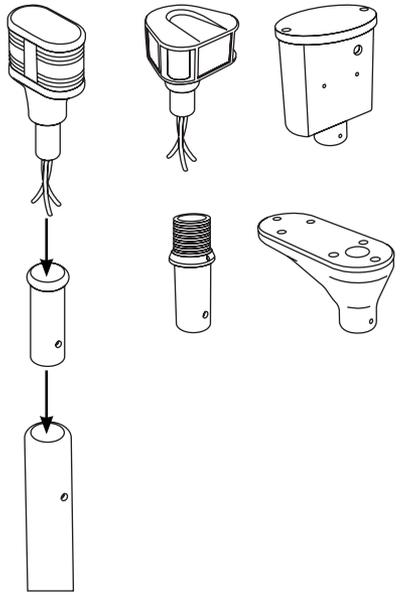

WWW.SEAVIEWGLOBAL.COM

TOOLS NEEDED

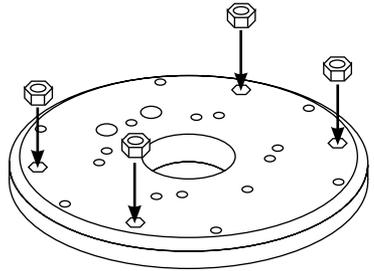

1

Install your light, adapter or box onto the light bar by following the instructions that came with the optional accessory.

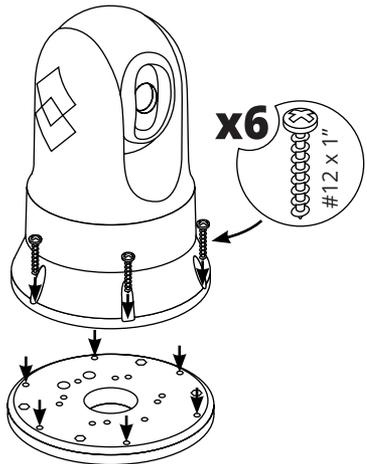

2

Insert the four nuts into the adapter plate. This has most likely been done for you.

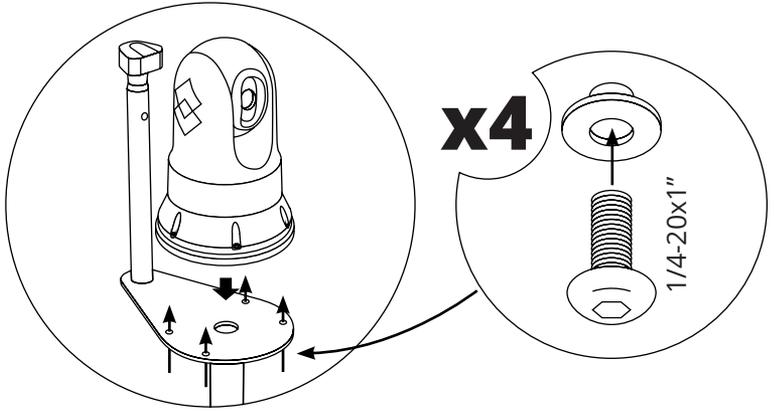

3A

Using a philips head screwdriver screw in the six #12x1" screws to secure the camera to the adapter plate. (For #LTB-SF2 only)

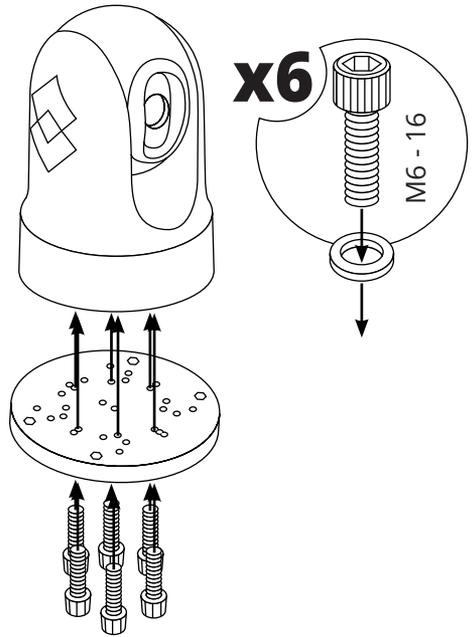

3B

Secure the camera or search light assembly to the light bar using the four 1/4-20x1" bolts and nylon shoulder washers.

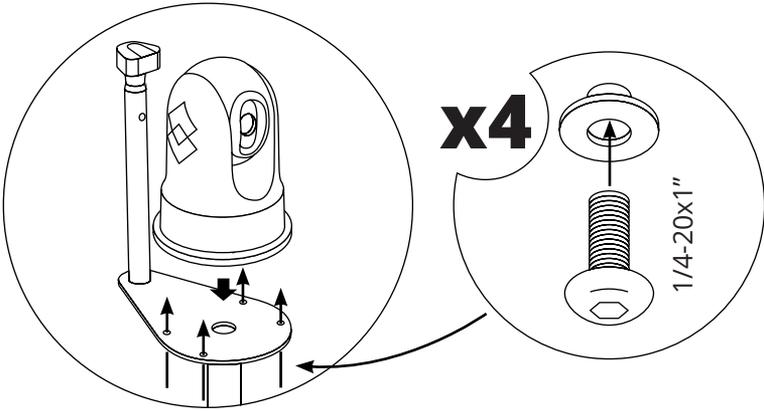

4A

Using a philips head screwdriver screw in the six M6 - 16mm bolts to secure the camera to the adapter plate. (For #LTB-SF only)

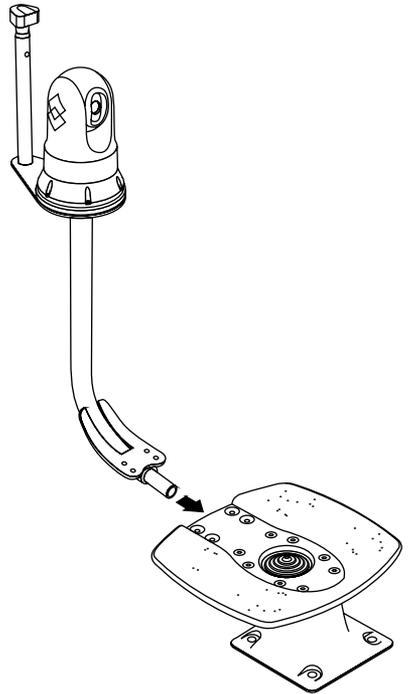

4B

Secure the camera or search light assembly to the light bar using the four 1/4-20x1" bolts and nylon shoulder washers.

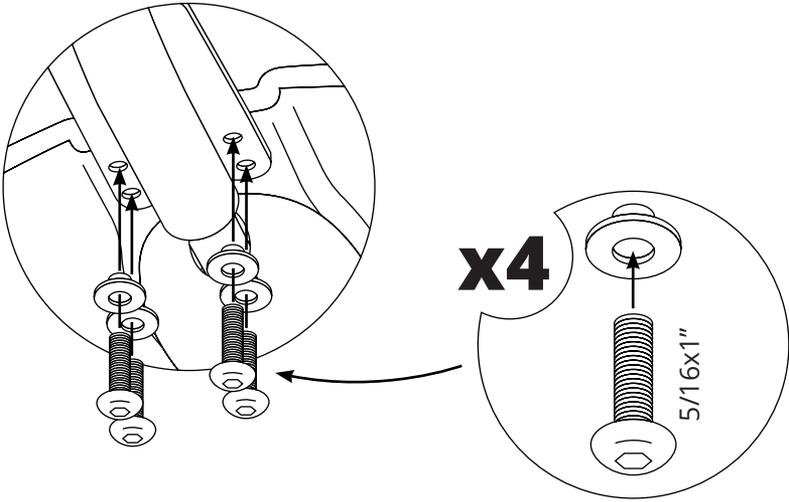

5

Insert the light bar into the light bar hole located on the back of the Seaview mount.

6A

Using the four 5/16x1" bolts and nylon shoulder washers, secure the light bar by bolting it to the top plate.

6B

When using the Seaview #SP1-MOD or #SP2-MOD Spreader Kits use the 5/16x3" bolts.

The background of the entire page is a light gray topographic map with white contour lines. The lines are irregular and wavy, representing terrain elevation. The map covers the entire page, with the text elements overlaid on it.
