

## Ecofan® Original Heat Powered Stove Fan

For use on freestanding wood stoves with a surface temperature between 230°F — 650°F (110°C — 345°C). The Ecofan® Original is an economical way to move air throughout your living space. Creating its own electricity and pushing up to 100 CFM (cubic feet per minute) this fan is ideal for those living off the grid or looking to increase the efficiency of their stove and use less fuel. Whisper quiet and completely assembled, these fans make for a great gift. Two year warranty.

### Product Features

- Creates its own electricity
- Circulates warm air throughout room
- Greater airflow at higher stove temperatures
- No assembly required
- Silent operation

### Benefits

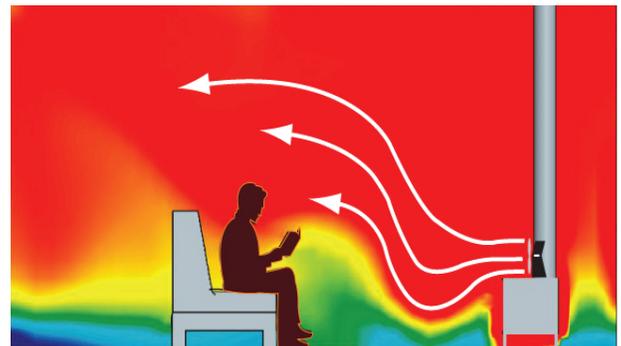

- 12% cost savings and reduced emissions from burning less fuel
- Increases comfort more quickly
- Effective on wood stoves
- Ready to use out of the box
- No loud blower noise
