

Wind-Tels™

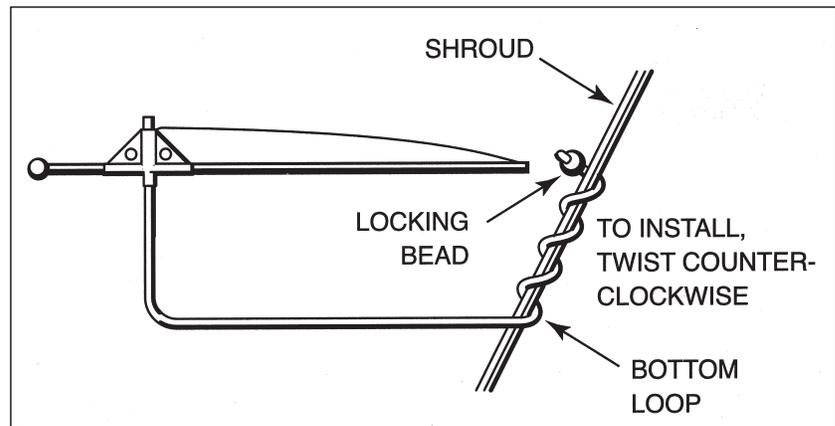

INSTRUCTIONS

Davis Wind-tels are shroud mounted wind direction indicators. They fit all shroud sizes. Effective at any angle of heel and in the lightest winds. Package includes red and green plastic vanes (port and starboard colors). Marine grade metal parts for durability. Ideal for saltwater sailing.

How to Install Wind-tels

Wind-tels' unique attachment prevents sliding or fouling on shrouds. To install, place bottom loop of Wind-tel spiral against shroud and "screw" on counter-clockwise until bead locks. See diagram at right.

Life of vanes can be preserved by removing Wind-tels after each sailing. To remove, "unscrew" the Wind-tel spiral clockwise.

Replacement vane sets are available from your local dealer or Davis Instruments. Ask for #1261.
